

Treatment Plan & Follow-up Instructions

Patient Name: John Doe

Age/Sex: 54 / Male

Date: March 21, 2025

Treatment:

- Azithromycin 500mg once daily for 5 days.
- Paracetamol 650mg every 6 hours for fever management.
- Continue Metformin and Amlodipine as prescribed.

Lifestyle Recommendations:

- Maintain hydration and get adequate rest.
- Monitor blood glucose levels regularly.
- Avoid excessive physical exertion until full recovery.

Follow-up:

- Return for evaluation in 7 days.
- Repeat blood work to assess infection resolution.
- If symptoms worsen (increased breathlessness, persistent fever), seek immediate medical attention.
